

FLEXIBLE BUT SAFE

The *pitch 50* rack system presents countless advantages due mainly to the flexibility in merchandise display changeover and obviously to the high degree of reliability in terms of safety.

FLEXIBLE BUT SAFE

Some examples:

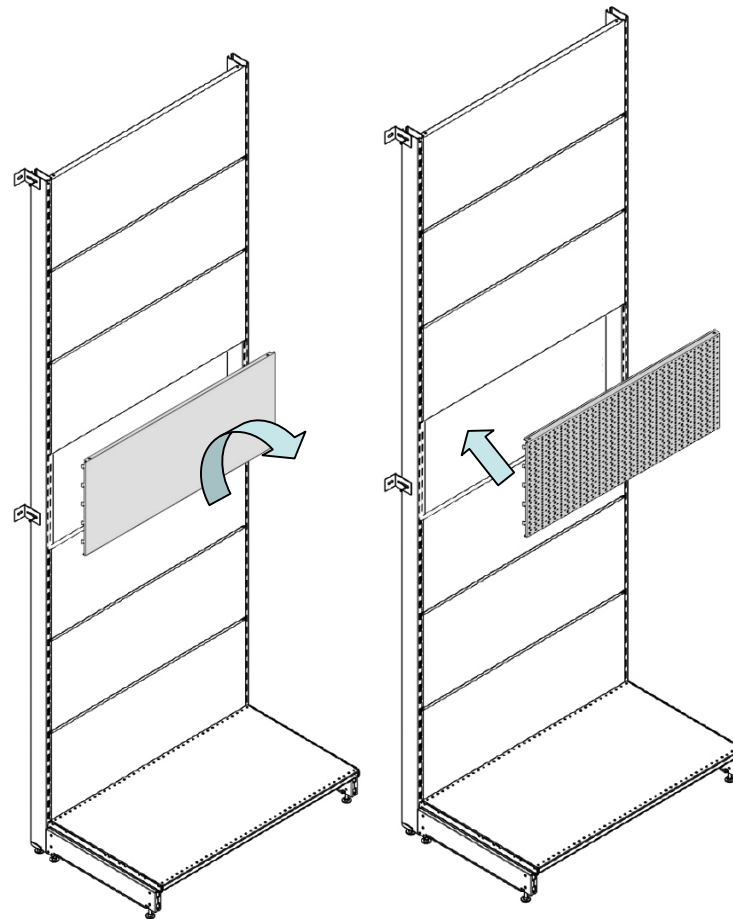

- the back panels can be removed independently at any height, speeding up display changeover
- The F50 structure offers countless “**integrated**” configuration possibilities, allowing items for sale to be displayed on *gondolas* and stocks to be placed on the upper levels on *racks*
- The wide range of accessories was designed on the basis of the specific display requirements of the DIY sector

FLEXIBLE AND PRACTICAL DISPLAY

Back panels that can be **removed and inserted** at any height, without removing the others

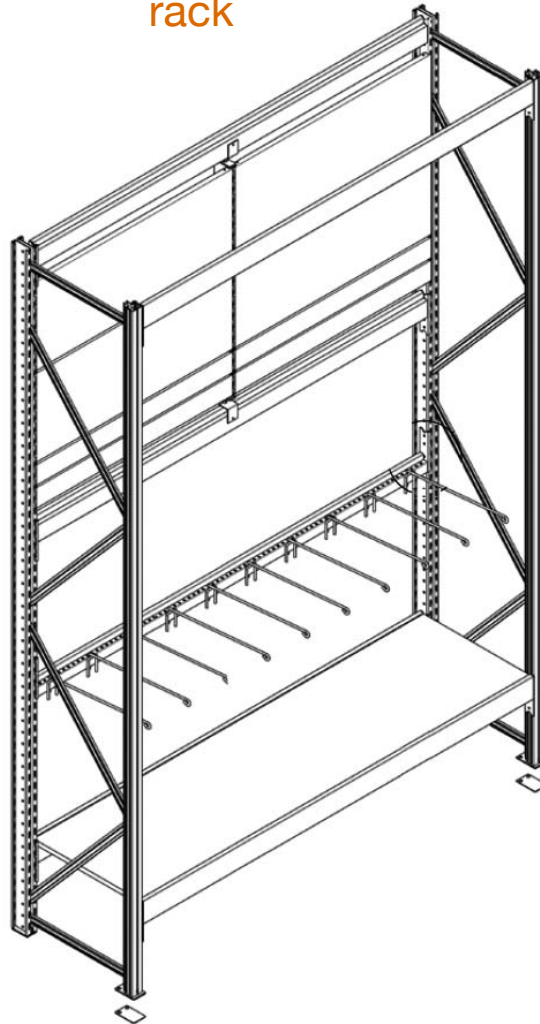

This means that you can easily change the display:

in this case, **removing** a plain panel and replacing it with a **perforated one, only where necessary**, thus optimising the **costs** of the back panels

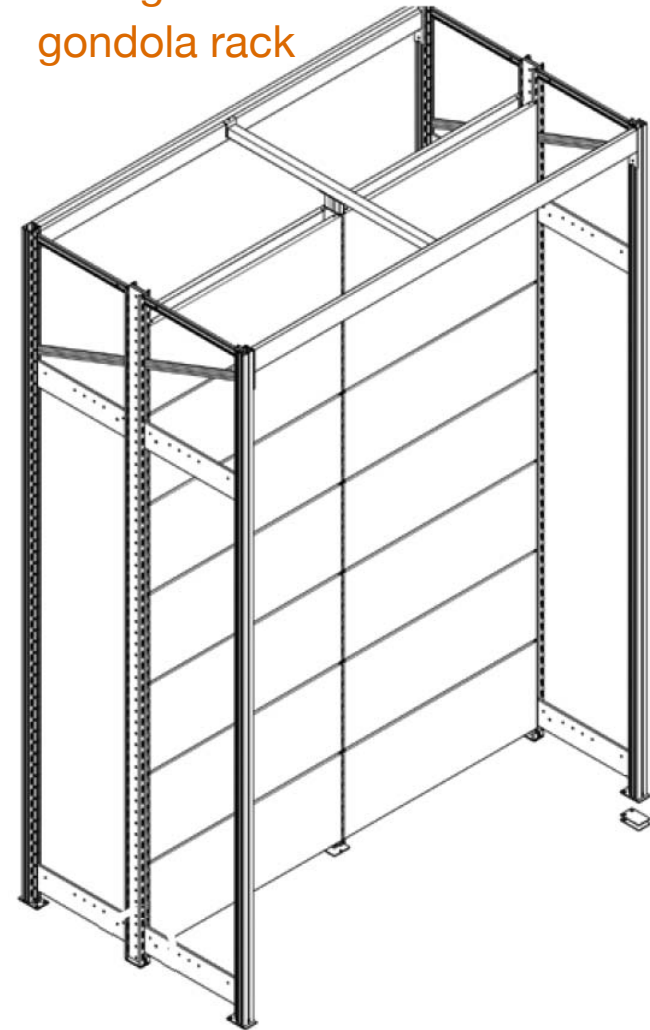

MAXIMUM RACK-GONDOLA INTEGRATION

Integrated wall
